Removes more bacteria from surfaces than microfiber.

Biodegradable and environmentally friendly.

One roll replaces 15 rolls of paper towel.

Certified compostable.

Mildew resistant.

*University of Arkansas testing, August, 2011

Buying paper towels is the same as throwing your money in the trash.

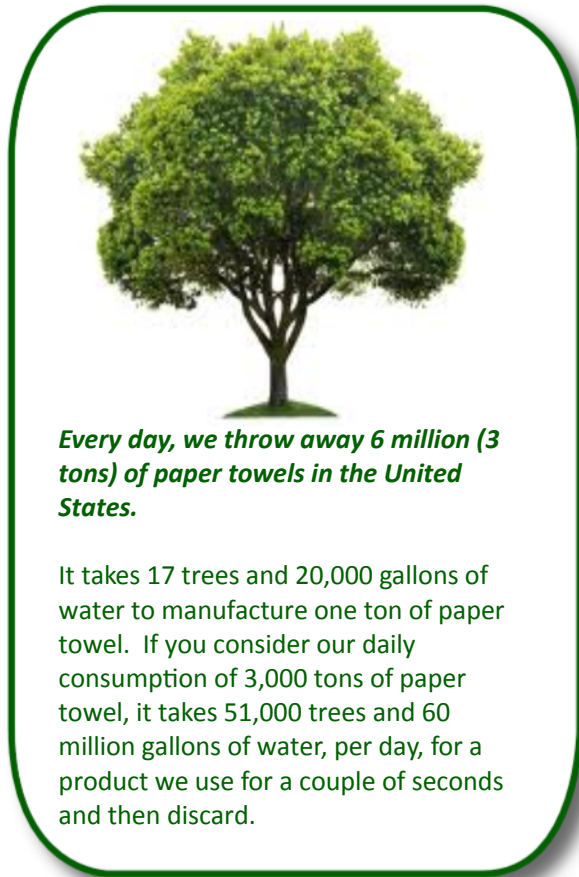

Why spend money on something you're going to throw away?

One roll replaces 15 rolls of paper towel.

Absorbs 10 times its weight.

Machine washable and dishwasher safe.

Reusable.

Every day, we throw away 6 million (3 tons) of paper towels in the United States.

It takes 17 trees and 20,000 gallons of water to manufacture one ton of paper towel. If you consider our daily consumption of 3,000 tons of paper towel, it takes 51,000 trees and 60 million gallons of water, per day, for a product we use for a couple of seconds and then discard.

*Biodegradable in a composting environment.

Week 1 - Dissolving process begins.

Week 2 - Dissolving process continues.

Week 3 - 20%-30% Dissolved.

Week 4 - 40% Dissolved.

Week 5 - 60% Dissolved.

Week 6 - 80% Dissolved.
